

## J.E.D.I. Symposium

Jacobs Encounters in Developmental Science from an Interdisciplinary Perspective

Prof. Dr.

**Kenneth Dodge and Alexander Grob**

Duke University

Prof. Dr.

University of Basel

will jointly discuss the topic

## Emotion Regulatory Development in Health and Disease: Implications for Mental Health and the Social Environment

Moderator: Prof. Dr. Nora M. Raschle (University of Zurich)

In this panel discussion, we aim to highlight the importance of understanding how emotion regulation develops in children and adolescents, both in typical and atypical cases. Furthermore, we aim to consider the impact this has on mental health or wider academic and social functions. The role of the social environment and the potential for interventions to improve outcomes are of similar interest. We invite you to join our panellist's discussion on how our knowledge from research on child development may contribute to a better understanding of disparities in mental health outcomes and to the question of when such endeavours may fail, respectively, what is still needed to reach population impact and a reduction of disparities.

**Wednesday, 21 June 2023**

**16:00 CET (Central European Time)**

**15:00 UTC (Universal Coordinated Time)**

**07:00 am PST (Pacific Standard Time)**

**10:00 am EST (Eastern Standard Time)**

**23:00 JST (Japan Standard Time)**

**Zoom meeting. Please register on this [Link](#)**

The event will be recorded and later published on our website: [jacobscenter.uzh.ch/en/events](https://jacobscenter.uzh.ch/en/events)

### **Prof. Dr. Alexander Grob**

is a Full Professor and Head of the Division “Personality and Developmental Psychology” at the University of Basel, Switzerland. In his research, Prof. Alexander Grob is concerned with topics such as the early intervention and later achievement of disadvantaged children and adolescents, the assessment of intelligence and developmental status across childhood and adolescence, cognitive, motor, and socio-emotional development in the first two decades of life, and personality development across the lifespan.

### **Prof. Dr. Kenneth A. Dodge**

is a William McDougall Distinguished Professor of Public Policy and Professor of Psychology and Neuroscience at Duke University. He is also the founding and past director of the Center for Child and Family Policy, as well as the founder of Family Connects International. Prof. Ken Dodge is an eminent expert in the advancement and mitigation of aggressive and violent behaviours. His research offers a blueprint for comprehending factors that contribute to certain young individuals adopting aggressive and violent tendencies. Moreover, his work establishes a structure for taking early action to avert the detrimental repercussions of violence on children and the communities they belong to.
